Experience

Library Data Coordinator & Web Developer

Library Research Service, Colorado State Library
2010 – present

- Develop and administer LRS and State Library services, including LRS (https://www.lrs.org), Library Jobline (https://www.libraryjobline.org), Library Directory (https://find.coloradolibraries.org), RIPL (https://ripl.lrs.org), and DART (https://dart.lrs.org).
- Administer internal and external State Library hardware (Linux, Windows, Cisco) and software.
- Administer Apache servers and MySQL databases.
- Provide customer service for multiple resources and tools within the above domains.
- Collect, analyze, and report quantitative and qualitative analytics data for LRS and State Library services.
- Research, plan, and implement new technologies and tools.
- Design and deliver training and instruction.
- Graphic design and photography for print and web.
- Consult with State Library units and external stakeholders on technology support and planning, and data collection and management.

Education

Master of Library and Information Science

Kent State University
2004
